## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3, 41-42 and 55-56, drawn to image segmentation, classified in class 382, subclass 173.
  - II. Claims 1, 4-8, 26-31, 41, 43-45, 51, 55, 57-59 and 67, drawn to transform coding, classified in class 382, subclass 248.
  - III. Claims 1, 9-16, 41, 46-49, 55 and 60-63 drawn to trainable classifiers, classified in class 382, subclass 159.
  - IV. Claims 1, 17-21, 37-41, 50, 53-55, 64 and 69-70, drawn to image transformation or preprocessing, classified in class 382, subclass 276.
  - V. Claims 1, 22-25, 32-36, 41, 52, 55, 65-66 and 68, drawn to determining amount an image is rotated or skewed, classified in class 382, subclass 289.
2. Based on the referral of "said plurality of sub-band portions" in claim 54, the Examiner figures that the applicant intends to have claim 54 depend on claim 53 and not on claim 52 and has treated it as such. However, appropriate correction is required.
3. The inventions are distinct, each from the other because of the following reasons:
4. Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is

separately usable. In the instant case, subcombination I has separate utility such as dividing image portions separate processing, subcombination II has separate utility such as coding face images after image transformations, subcombination III has separate utility such as classifying facial images, subcombination IV has separate utility such as image correction, and subcombination V has separate utility such as rotation correction. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

5. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 2624

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kathleen S. Yuan whose telephone number is (571)272-2902. The examiner can normally be reached on Monday to Thursdays, 9 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Mancuso can be reached on (571)272-7695. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
